

MeroSys launches managed online food ordering service

MeroSys introduces an easy to install, use and maintenance-free online food ordering service.

New Delhi - May 6th, 2007 - MeroSys, a leading provider of online food ordering system, announced that it is offering managed online food ordering service to restaurateurs. The new service intends on offering managed online food ordering services to restaurateurs with an ability to get a custom design suitable for their restaurants.

Through its managed services, MeroSys offers a number of advantages including 24x7 online ordering, user-friendly system, scalable order taking capabilities, reduction in staff requirements, elimination of fake ordering and removing the chances of making errors while taking orders.

"Restaurateurs are yet to tap the full potential of the Internet to bring down their day-to-day costs and increase revenues", said Simran Khanna, marketing Head of MeroSys. "Customer service is crucial in this industry and MeroSys offers a convenient medium to order food online eliminating much of the problems faced currently by both the restaurants and the customers".

As the Internet gains popularity, an online food ordering system is becoming an essential part of any restaurant's marketing arsenal. With managed online food ordering service, restaurateurs do not need to host or maintain the system, letting them to concentrate on their business. The system comes for a monthly fee with plans starting for as low as US\$50 per month.

MeroSys is currently in talks with numerous restaurant chains

Restaurateurs can log on to www.merosys.com or call MeroSys at +1 866-404-6122 to register their restaurants with the service.
